

HUMAN LIFE SAFETY

ANNOTATION

TO THE CURRICULUM OF THE INSTITUTION OF HIGHER EDUCATION

Specialty 1-28-01-02 Email Marketing

Qualification of a specialist **Marketing programmer**

	Form of higher education Full-time (daytime)
Semester	1
Lectures, hours	34
Practical (seminar) classes, hours	16
Laboratory classes, hours	16
Exam, semester	1
Classroom hours in the academic discipline	66
Independent work, hours	120
Total hours in the academic discipline / credit units	186/5

1. Summary of the discipline

Global environmental problems Natural and anthropogenic sources of atmospheric pollution The problem of water supply in the world and sources of water pollution Environmental problems of the use of land and biological resources Sanitary state of the natural environment and its impact on human health Exhaustible sources of energy. Rational use of subsoil resources Conventional energy sources

Energy saving in buildings and structures The physical nature of radiation hazards for humans and the natural environment The impact of ionizing radiation on the human body The main ways to protect the population and objects Safety at work. Legal and organizational issues of labor protection Industrial sanitation and occupational health Electrical safety Fundamentals of fire safety Protection from dangerous and harmful factors when working on a personal computer

2 Learning outcomes

To know:

- ways to protect the population and eliminate the consequences of emergency situations;
- global and local environmental problems;
- principles of using alternative energy sources ;
- the main provisions of regulatory legal acts in the field of labor protection management and fire safety in the Republic of Belarus.

can:

- apply means of protection against negative environmental influences ;
- analyze the quality of the environment;
