

CHEMISTRY

(course title)

COURSE SYLLABUS ABSTRACT

1–37 01 06 «Technical operation of vehicles» (by directions)

1–37 01 06 -01 «Technical operation of vehicles» (motor transport of general and personal use)

	Form of higher education		
	Ochnaya	Zaochnaya	Zaochnaya (sokrashchennaya)
Year	1	1	1
Semester	2	2	1
Lectures, hours	34	8	4
Practical classes (seminars), hours	16	4	2
Laboratory classes, hours	16	16	16
In-class test (semester, hours)	2	2	1
Course paper, semester	66	16	10
Course project, semester	42	92	98
Pass/fail, semester	108/3	108/3	108/3

1. Course outline

The discipline belongs to the module «Natural science training», (state component).

The list of academic disciplines (cycles of disciplines) that will be based on this discipline: - materials

2. Course learning outcomes

Upon completion of the course, students will be expected to know:

- the basic concepts and laws of chemistry;
- basic patterns of chemical reactions; basic electrochemical processes, the phenomenon of metal corrosion, the process and laws of electrolysis;
- the latest achievements in the field of chemistry and prospects for their use.

be able to:

- formulate and apply the basic laws, principles and concepts of chemistry in accordance with the program;

possess:

- have the skills to perform basic chemical laboratory operations

3. Competencies

Apply knowledge of natural science disciplines for experimental and theoretical study, analysis and solution of applied and engineering problems

4. Requirements and forms of midcourse evaluation and summative assessment

To assess the level of knowledge of students, the following diagnostic tools are used:

- oral and written questioning during practical classes; carrying out control works (test tasks) on separate topics, protection of laboratory works.
