

THEORETICAL MECHANICS

(course title)

COURSE SYLLABUS ABSTRACT

1 – 70 02 01 «Industrial and civil construction»

(speciality code and name)

| | STUDY MODE | | |
|-----------------------------------------------|------------|-----------|----------------------------------|
| | full-time | part-time | part-time (shortened program) |
| Year | 1,2 | 2 | 1,2 |
| Semester | 2,3 | 3,4 | 2,3 |
| Lectures, hours | 68 | 14 | 14 |
| Practical classes (seminars), hours | 50 | 10 | 10 |
| In-class test (semester, hours) | - | 3 (2) | 2 (2) |
| Pass/fail, semester | 3 | 4 | 3 |
| Exam, semester | 2 | 3 | 2 |
| Contact hours | 118 | 26 | 26 |
| Independent study, hours | 98 | 190 | 190 |
| Total course duration in hours / credit units | 216/ 6 | | |

1. Course outline

The purpose of the discipline is to study the basic concepts, laws and methods of theoretical and analytical mechanics and their application to study the dynamics of machines and methods of their calculation, as well as to build mathematical models of machines used in computer-aided design and forecasting.

2. Course learning outcomes

Upon completion of the course, students will be expected to know:

- basic concepts of mechanics;
- laws of mechanics.

be able to:

- apply methods of formalization of working processes of machines;
- to make calculated mathematical models of machines using computer technology for their

solution and analysis.

possess:

- methods used in mechanics to describe mechanical systems;
- laws and methods of mechanics for the analysis of complex mechanical systems;
- laws and methods of mechanics for constructing mathematical models of mechanical

systems.

3. Competencies

BPC -1: Apply knowledge of natural science academic disciplines to solve applied engineering and construction tasks

4. Requirements and forms of midcourse evaluation and summative assessment

The following forms are used to diagnose competencies:

- written;
- oral-written.

To assess the level of knowledge of students, the following diagnostic tools are used: control papers; reports on classroom practical exercises with their oral defense; exam; pass/fail assessment based on a modular rating system.
