FUNDAMENTALS OF INFORMATION TECHNOLOGY

Annotation to the curriculum of a higher education institution

Specialties: 7-06-0311-01 - Economics. 7-06-06-0612-03 Information management systems; 7-06-0714-02 - Innovative technologies in mechanical engineering; 7-06-0714-02 - Innovative technologies in mechanical engineering; 7-06-0715-01 - Transportation; 7-06-0716-03 Instrumentation; 7-06-0732-01 Construction; 7-06-0732-01 Logistics services in transportation.

Specialties: Mechanical Engineering and Mechanical Engineering, Transport, Mining and Construction Engineering. Welding technologies, Non-destructive testing techniques and technologies, Designing of wheeled vehicles, Technical exploitation of vehicles, System analysis, control and information processing. Power engineering and electrical engineering, Construction of roads, Economic development of industrial and transport organizations.

	Form of education			
	Technical specialties		Economic specialties	
	Full-time (day	Correspondence	Full-time (day)	Correspondence
Course	1	1	1	1
Semester	1	2	1	1
Lectures, hours	36	8	36	10
Laboratory classes, hours	36	8	36	8
Credit, semester	1	2	1	1
Classroom hours in the academic discipline	72	16	72	18
Independent work	36	92	36	90
Total hours of academic discipline / credits	108/3	108/3	108/3	108/3

- 1. Summary of the academic discipline
- 2. Learning outcomes know: trends in the development of information technologies; fundamentals of network technologies and Internet services; graphic and tabular processors, databases, presentation preparation tools and mathematical calculations; basic methods of mathematical modeling and optimization. be able to: use modern information technologies in scientific research; perform formulation and programming tasks in their subject area; possess: information technologies for working in the environment of MathCad and MatLab packages; methods of minimizing functions, conditional optimization, solving variational problems.
- 3. Competencies to be formed: for: 7-06-0311-01 UK-2 To solve research and innovation tasks on the basis of application of information and communication technologies. 7-06-06-0612-03 UK-2 Solve research and innovation tasks on the basis of application of information and communication technologies; 7-06-0714-02 UK-2 Solve research and innovation tasks on the basis of application of information and communication technologies;

7-06-0715-01 - UK-2 To solve research and innovation tasks on the basis of information and communication technologies; 7-06-0716-03 UK-2 To solve research and innovation tasks on the basis of information and communication technologies; 7-06-0732-01 UK-2 To solve research and innovation tasks on the basis of information and communication technologies; 7-06-0732-01 UK-2 To solve research and innovation tasks on the basis of information and communication technologies; 7-06-1042-01 UK-2 To solve research and innovation tasks on the basis of information and communication technologies

4. Requirements and forms of current and interim certification.

The current control is determined by the protection of laboratory work and the current certification – candidate differentiated credit.
