The distribution of academic discipline by semester

	Form of obtaining higher education	
	Full-time (daytime)	Correspondence Correspondence abbreviated
Well	4	4
Semester	7	7
Lectures, hours	16	4
Practical classes	16	4
Course project, semester	7	7
Exam, semester	32	8
Independent work, hours	76	100
Total hours per academic discipline / credit units	108/3	

1 Summary of the discipline

The discipline covers general issues of exclusive rights to specific results of human intellectual activity in any field (industrial, scientific, literary, etc.), as well as the rights to means of individualization of products, completed works, legal entities, services, including copyrights and related rights, as well as industrial property.

2 Learning Outcomes

Upon completion of the discipline, the student should know the interpretation of basic concepts in the field of intellectual property, the provisions of international and national legislation, the procedure for registering and protecting rights to intellectual property objects, and issues of intellectual property management in an organization (enterprise). They should be able to conduct patent information searches, including using the Internet, prepare applications for the issuance of protective documents, draft contracts concluded in the field of intellectual property, have skills in working with international patent classifications, and determine the index of the search subject's rubric.

3 Formed Competencies

Work in a team, tolerantly perceive social, ethnic, confessional cultures, and other differences. Apply the norms of international and national legislation in the process of creating and realizing intellectual property objects.

4 Requirements and Forms of Current and Interim Assessment

Current assessment is carried out based on students' defense of individual assignments, as well as their completion of control works. Both oral and written forms of conduct are used. Interim assessment – pass/fail exam. Conducted orally.
