	full-time
Year	4
Semester	7
Lectures, hours	34
Practicalclasses (seminars), hours	16
Credit, semester	7
Contact hours	50
Independent study, hours	58
Total course duration in hours / credit units	108/3 з.е.

1. Course outline

Includes the study of the theory and practice of real estate management, taking into account the specific economic, legal, and technical characteristics of real estate, as well as the specifics of managing individual types of real estate.

2. Course learning outcomes

Upon completion of this course, students should understand the principles of real estate management; be able to obtain and analyze information on the operation of a property; conduct economic calculations to justify decisions made during the operation of the property; effectively draft the necessary contracts with tenants, owners, and specialized organizations servicing the property; and possess the ability to work with regulatory and technical literature.

3. Developed Competencies

Apply the basic laws of real estate management, utilize knowledge of the structure of technical regulations, and master the procedures for their development and implementation.

4. Requirements and forms of current and interim certification

Ongoing student assessment is conducted to determine whether their academic performance meets the requirements of educational standards and the curriculum documentation of higher education programs. Interim student assessment is conducted through credit assessment. Interim assessment is conducted in oral and written form. The forms of current certification are: survey, defense of an individual practical assignment.
