PRE-DIPLOMA PRACTICE
(course title)

INTERNSHIP COURSE SYLLABUS
ABSTRACT

Specialty 6 – 05– 0732–02 «Real estate expertise and management»
(speciality code and name)

	STUDY MODE
	full-time
Year	4
Semester	8
Total course duration in hours / credit units	216/5

1. Internship course outline (aims and objectives)

The purposes of the practice is to consolidate practical skills in the field of operation, management, assessment, examination and inspection of real estate by students in the production environment.

Tasks of practice are:

– mastering and consolidating the knowledge and skills of students acquired at the university throughout the course of study; checking the possibilities of independent work of a future specialist in a specific production environment;

– collection of initial data (based on analogues) for development of diploma project;

– generation of materials for graduation project;

– study of the requirements for the development of design solutions in relation to the topic of the diploma project, familiarization with specific projects of similar construction projects.

2. Course learning outcomes

Learning outcomes:

– to consolidate theoretical knowledge about the functioning of the real estate market;

– to master practical skills of using design documentation in professional activities, as well as TNPA in the field of construction and reconstruction of buildings and structures;

– to develop practical expertise of generalization and analysis of design documentation on similar objects.

3. Competencies

During practical training the following competences are being formed or developed

Name of competencies to be formed
Be capable of self-development and improvement in professional activities
Apply the requirements of technical regulatory legal acts, develop design (engineering) and other technical documentation for construction
Apply the basic laws of real estate management, use knowledge about the structure of technical regulatory legal acts, master the procedure for their development and implementation
Apply a set of measures and actions aimed at achieving the goals of the construction process

4. Form of midcourse evaluation

The practice ends with a differentiated credit on the basis of the submitted report and answers at its defense.
